DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Toogood (US RE 36,659).

The device of Toogood reads on the structural claims of the invention including a rotatable base (90), a plurality of closed-sided tooth sockets having a substantially rectangular and generally flat bottom and four upright sides (108) and a plurality of tooth assemblies (150, 154, 156). It should be noted that the Examiner takes the position that the recessed box of Toogood has a length dimension that is greater than 2 times the width dimension and the depth of the tooth socket is greater than 1/16 inches.

Claims 1-4, 7, 8-13 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Oppelt et al (US Patent# 6,203,251).

The device of Oppelt et al reads on the structural claims of the invention including a rotatable base (1), a plurality of closed-sided tooth sockets having a substantially rectangular and generally flat bottom and four upright sides (12) and a plurality of tooth assemblies (2 and 3).

Claims 1-3, 8-12, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Proulx (GB2005170A).

The device of Proulx reads on the structural claims of the invention including a rotatable base (20), a plurality of closed-sided tooth sockets having a generally flat bottom and four upright sides (26) and a plurality of tooth assemblies (29,33).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 6, 14, 15, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toogood.

In the event applicant disagrees with the rejection above, these claims do not appear to contain any additional features, which in combination with the features to any claim to which they refer, add anything novel. As such, it would have been an obvious design choice to one having ordinary skill in the art to add any of the claimed features to the prior art device.

Claims 5, 6, 14, 15, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oppelt et al.

In the event applicant disagrees with the rejection above, these claims do not appear to contain any additional features, which in combination with the features to any claim to which they refer, add anything novel. As such, it would have been an obvious design choice to one having ordinary skill in the art to add any of the claimed features to the prior art device.
